Jyllian Bradshaw Legal Counsel The Dayton Board of Education 115 South Ludlow Street Dayton, OH 45402

RE: Appraisal of Special Purpose - Former Public School known as Former Longfellow Alternative School located at 245 Salem Ave., Dayton, Montgomery County, Ohio 45406

NKF Job No.: 734-2018-0048

Newmark Knight Frank – Valuation & Advisory has prepared an appraisal of the market value of the referenced property presented in the following Appraisal Report.

Summary of the Subject Property

The subject is an existing special purpose - former public school property containing 75,512 square feet of gross building area. The improvements were constructed in 1920/1950 and are 100% vacant as of the effective appraisal date. The site area is 3.7389 acres or 162,866 square feet. The subject was occupied by the Longfellow Alternative High School until summer 2017.

Key Investment Considerations

The top positive (+) factors influencing the subject property are:

- The subject is located within one mile from the Interstate 75/Third Street Interchange and approximately 1 ½ miles from State Route 35/South Ludlow Street interchange.
- The subject has good exposure/visibility and benefits from its frontage along Salem Avenue.

The most negative (-) or risk factors affecting the subject property are:

- **The subject property is 100% vacant.**
- The subject improvements evidenced deferred maintenance including extensive ceiling damage from roof leaks, and many areas having water pipes that have burst due to the winter weather conditions.
- The subject improvements showed functional obsolescence as the result of multiple additions and merging of various building structures.
- The population and number of households within the subject's surrounding area have decreased over the last decade, and is projected to remain flat in the next five years.

Subject Conclusion: The subject is in the bottom of the market for the subject due to the extensive deferred maintenance, functional obsolescence of its improvements and its location in a submarket with a declining population and number of households.

Extraordinary Assumptions and Hypothetical Conditions

The value conclusions are not subject to any extraordinary assumptions that may affect the assignment results. An extraordinary assumption is uncertain information accepted as fact. If the assumption is found to be false as of the effective date of the appraisal, we reserve the right to modify our value conclusions. No extraordinary assumptions were necessary.

The value conclusions are not based on any hypothetical conditions that may affect the assignment results. A hypothetical condition is a condition contrary to known fact on the effective date of the appraisal but is supposed for the purpose of analysis. No hypothetical conditions were necessary.

Based on the analysis contained in the following report, the opinion of value for the subject is concluded as follows

Value Conclusion			
Appraisal Premise	Interest Appraised	Date of Value	Value Conclusion
Market Value	Fee Simple	February 6, 2018	\$230,000

The intended use and user of our report are specifically identified in our report as agreed upon in our contract for services and/or reliance language found in the report. No other use or user of the report is permitted by any other party for any other purpose. Dissemination of this report by any party to non-client, non-intended users does not extend reliance to any other party and Newmark Knight Frank will not be responsible for unauthorized use of the report, its conclusions or contents used partially or in its entirety.

The appraisal was developed based on, and this report has been prepared in conformance with, the guidelines and recommendations set forth in the Uniform Standards of Professional Appraisal Practice (USPAP), the requirements of the Code of Professional Ethics and Standards of Professional Appraisal Practice of the Appraisal Institute and Title XI of the Financial Institution Reform, Recovery and Enforcement Act (FIRREA) of 1989.

Certification

We certify that, to the best of our knowledge and belief:

- 1. The statements of fact contained in this report are true and correct.
- 2. The reported analyses, opinions, and conclusions are limited only by the reported assumptions and limiting conditions and are our personal, impartial and unbiased professional analyses, opinions, and conclusions.
- 3. We have no present or prospective interest in in the property that is the subject of this report and no personal interest in with respect to the parties involved.
- 4. We have no bias with respect to the property that is the subject of this report or to the parties involved with this assignment.
- 5. Our engagement in this assignment was not contingent upon developing or reporting predetermined results.
- 6. Our compensation for completing this assignment is not contingent upon the development or reporting of a predetermined value or direction in value that favors the cause of the client, the amount of the value opinion, the attainment of a stipulated result, or the occurrence of a subsequent event directly related to the intended use of this appraisal.
- 7. This appraisal assignment was not based upon a requested minimum valuation, a specific valuation, or the approval of a loan.
- 8. Our analyses, opinions, and conclusions were developed, and this report has been prepared, in conformity with the Uniform Standards of Professional Appraisal Practice, as well as the requirements of the State of Ohio.
- 9. The reported analyses, opinions and conclusions were developed, and this report has been prepared, in conformity with the requirements of the Code of Professional Ethics and Standards of Professional Appraisal Practice of the Appraisal Institute
- 10. The use of this report is subject to the requirements of the Appraisal Institute relating to review by its duly authorized representatives.
- 11. As of the date of this report, Kelly Fried, MAI, has completed the continuing education program for Designated Members of the Appraisal Institute.
- 12. As of the date of this report, Kelly Fried, MAI and Ileana Abot, GISP, MBA have completed the continuing education requirements mandated by the State of Ohio.
- 13. Kelly Fried, MAI, made a personal inspection of the property that is the subject of this report. Ileana Abot has personally inspected the subject.
- 14. Valuation & Advisory operates as an independent economic entity within NKF. Although employees of other NKF divisions may be contacted as a part of our routine market research investigations, absolute client confidentiality and privacy were maintained at all times with regard to this assignment without conflict of interest.

- 15. Within this report, "Newmark Knight Frank", "NKF Valuation & Advisory", "NKF, Inc.", and similar forms of reference refer only to the appraiser(s) who have signed this certification and any persons noted above as having provided significant real property appraisal assistance to the persons signing this report.
- 16. We have not performed any services, as an appraiser or in any other capacity, regarding the property that is the subject of this report within the three-year period immediately preceding acceptance of this assignment.

Introduction

Sale History

To the best of our knowledge, no sale or transfer of ownership has taken place within a threeyear period to the effective appraisal date.

Pending Transactions

To the best of our knowledge, the property is not subject to an agreement of sale or an option to buy, nor is it listed for sale, as of the effective appraisal date.

Description of the Appraisal and Appraisal Report

Intended Use and User

The intended use of the appraisal is for internal business decisions and no other use is permitted.

The client and intended user is The Dayton Board of Education.

Intended Users - the intended user is the person (or entity) who the appraiser intends will use the results of the appraisal. The client may provide the appraiser with information about other potential users of the appraisal, but the appraiser ultimately determines who the appropriate users are given the appraisal problem to be solved. Identifying the intended users is necessary so that the appraiser can report the opinions and conclusions developed in the appraisal in a manner that is clear and understandable to the intended users. Parties who receive or might receive a copy of the appraisal are not necessarily intended users. The appraiser's responsibility is to the intended users identified in the report, not to all readers of the appraisal report.

Source: Appraisal Institute, *The Dictionary of Real Estate Appraisal*, 6th ed. (Chicago: Appraisal Institute, 2015)

Purpose of the Appraisal

The purpose of the appraisal is to develop an opinion of the market value of the fee simple estate in the property as of the effective date of the appraisal, February 6, 2018. The date of the report is March 30, 2018.

Definition of Value

Market value is defined as:

"The most probable price which a property should bring in a competitive and open market under all conditions requisite to a fair sale, the buyer and seller each acting prudently and knowledgeably, and assuming the price is not affected by undue stimulus. Implicit in this definition is the consummation of a sale as of a specified date and the passing of title from seller to buyer under conditions whereby:

- Buyer and seller are typically motivated;
- Both parties are well informed or well advised, and acting in what they consider their own best interests;
- A reasonable time is allowed for exposure in the open market;
- Payment is made in terms of cash in U.S. dollars or in terms of financial arrangements comparable thereto; and
- The price represents the normal consideration for the property sold unaffected by special or creative financing or sales concessions granted by anyone associated with the sale."

(Source: Code of Federal Regulations, Title 12, Chapter I, Part 34.42[g]; also Interagency Appraisal and Evaluation Guidelines, Federal Register, 75 FR 77449, December 10, 2010, page 77472)

Interest Appraised

We have appraised the fee simple estate of the subject property.

Fee Simple Estate - Absolute ownership unencumbered by any other interest or estate, subject only to the limitations imposed by the governmental powers of taxation, eminent domain, police power, and escheat.

Source: Appraisal Institute, *The Dictionary of Real Estate Appraisal*, 6th ed. (Chicago: Appraisal Institute, 2015)

Scope of Work

This appraisal is presented in the form of an appraisal report, which is intended to comply with the reporting requirements set forth under Standards Rule 2-2(a) of USPAP. This report incorporates practical explanation of the data, reasoning and analysis that were used to develop the opinion of value.

Extent to Which the Property is Identified

The property is identified through various sources such as:

- Postal address
- Assessor's records
- Legal description

Extent to Which the Property is Inspected

Kelly Fried, MAI, conducted an interior and exterior inspection of the property on February 6, 2018. Ileana Abot conducted an interior and exterior inspection on February 6, 2018.

Type and Extent of the Data Researched

- Exposure and marking time;
- Neighborhood and land use trends;
- Demographic trends;
- Market trends relative to the subject property type;
- Real estate tax data;
- Flood zone status;
- Zoning requirements and compliance;
- Comparable listing and sales data; and
- Cost data via Marshall Valuation Service.

Type and Extent of Analysis Applied

We analyzed the property and market data gathered through the use of appropriate, relevant, and accepted market-derived methods and procedures. Further, we employed the appropriate and relevant approaches to value, and correlated and reconciled the results into an estimate of market value, as demonstrated within the appraisal report.

Ileana Abot researched and reviewed data related to the subject property and market comparables. Ms. Abot also assisted in the development of the report.

Appraisal Methodology

Cost Approach - The cost approach is based on the proposition that the informed purchaser would pay no more for the subject than the cost to produce a substitute property with equivalent utility. This approach is particularly applicable when the property being appraised involves relatively new improvements that represent the highest and best use of the land, or when it is improved with relatively unique or specialized improvements for which there exist few sales or leases of comparable properties.

Sales Comparison Approach - The sales comparison approach utilizes sales of comparable properties, adjusted for differences, to indicate a value for the subject. Valuation is typically accomplished using physical units of comparison such as price per square foot, price per unit, price per floor, etc., or economic units of comparison such as gross rent multiplier. Adjustments are applied to the physical units of comparison derived from the comparable sale. The unit of comparison chosen for the subject is then used to yield a total value.

Income Capitalization Approach - The income capitalization approach reflects the subject's income-producing capabilities. This approach is based on the assumption that value is created by the expectation of benefits to be derived in the future. Specifically estimated is the amount an investor would be willing to pay to receive an income stream plus reversion value from a property over a period of time. The two common valuation techniques associated with the income capitalization approach are direct capitalization and the discounted cash flow (DCF) analysis.

Approaches to Value		
Approach	Applicability to Subject	Use in Assignment
Cost Approach	Applicable	Utilized
Sales Comparison Approach	Applicable	Utilized
Income Capitalization Approach	Not Applicable	Not Utilized

The income capitalization approach was not used because the subject is not an income producing property and this approach does not reflect market behavior for this property type. The exclusion of this approach is not considered to impact the reliability of the appraisal.

Economic Analysis

Dayton MSA Area Analysis

The subject is located in the Dayton, OH Metropolitan Statistical Area, hereinafter called the Dayton MSA, as defined by the U.S. Office of Management and Budget. The Dayton MSA is 1,282 square miles in size, and ranks 72 in population out of the nation's 382 metropolitan statistical areas.

Moody's Economy.com provides the following Dayton MSA metro area (DAY) economic summary as of June 2017. The full Moody's Economy.com report is presented in the addenda.

Recent Performance

Dayton's economy is shaping up, thanks primarily to its strengthening housing market. Although the pace falls short of the national average, house price growth is accelerating at its fastest rate in more than 15 years. Constricted supply and modestly rising demand pushed prices to an all-time high this spring and are bolstering household balance sheets.

Although payrolls are up slightly since January and the quality of positions added has improved, average hourly earnings remain down significantly over the year amid a still-loose labor market. Job losses have been concentrated in the public sector, construction, and nondurable goods production, and even traditional sources of strength such as healthcare and machinery manufacturing have flatlined in recent months. However, professional and technical services have marched upward since the start of the year, and steel manufacturers are still providing support.

Population

The Dayton MSA has an estimated 2017 population of 804,387, which represents an average annual 0.1% increase over the 2010 census of 799,232. The Dayton MSA added an average of 736 residents per year over the 2010-2017 period, and its growth in population contrasts with Montgomery County which had a 0.1% average annual decrease in population over this time.

Looking forward, the Dayton MSA's population is projected to increase at a 0.1% annual rate from 2017-2022, equivalent to the addition of an average of 1,001 residents per year. The

Dayton MSA's population growth differs from Montgomery County, which is projected to have little or no change in population during this time.

	Population	Compound Ann. % Chng			
	2010 Census	2017 Estimate	2022 Projection	2010 - 2017	2017 - 2022
Ohio	11,536,504	11,755,535	11,891,924	0.3%	0.2%
Dayton MSA	799,232	804,387	809,390	0.1%	0.1%
Montgomery County	535,153	533,054	532,490	-0.1%	0.0%
City of Dayton	141,542	140,450	140,353	-0.1%	0.0%

Employment

Total employment in the Dayton MSA is currently estimated at 389,000 jobs. Between yearend 2006 and the present, employment declined by 11,400 jobs, equivalent to a 2.8% loss over the entire period. There were declines in employment in three out of the past ten years, influenced in part by the national economic downturn and slow recovery.

A comparison of unemployment rates is another way of gauging an area's economic health. Over the past decade, the Montgomery County unemployment rate has been consistently higher than that of the Dayton MSA, with an average unemployment rate of 7.7% in comparison to a 7.4% rate for the Dayton MSA. A higher unemployment rate is a negative indicator.

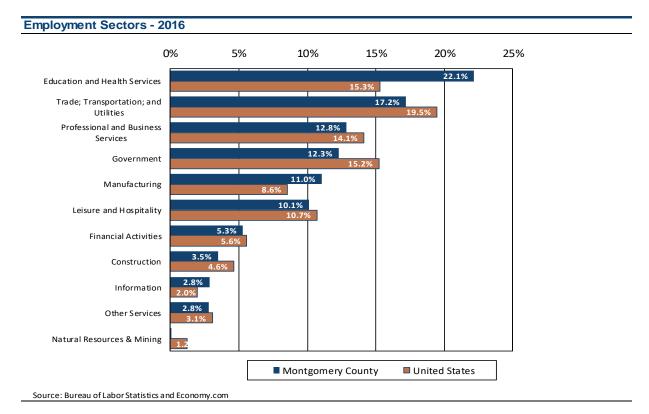

Recent data shows that the Montgomery County unemployment rate is 4.6% in comparison to a 4.4% rate for the Dayton MSA, a negative sign for Montgomery County.

Employment Sectors

The composition of the Montgomery County job market is depicted in the chart below. A complete data set is not available for the Dayton MSA, so we will compare Montgomery County to the United States. Total employment for the two areas is broken down by major employment sector, and the sectors are ranked from largest to smallest based on the percentage of Montgomery County jobs in each category.

Major Employers

Major employers in the Dayton MSA are shown in the following table.

Name	Number of Employees	
Wright-Patterson Air Force Base	26,270	
Premier Health Partners	14,000	
Kettering Health Network	7,115	
The Kroger Co.	5,582	
Miami University	3,564	
Wright State University	3,303	
LexisNexis	3,200	
Sinclair Community College	2,601	
Honda of America Manufacturing Inc.	2,600	
) AK Steel Corp.	2,400	

Gross Domestic Product

Gross Domestic Product (GDP) is a measure of economic activity based on the total value of goods and services produced in a defined geographic area. Although GDP figures are not available at the county level, data reported for the Dayton MSA is considered meaningful when compared to the nation overall, as Montgomery County is part of the MSA and subject to its influence.

The Dayton MSA ranks 68 in Gross Domestic Product (GDP) out of the nation's 382 metropolitan statistical areas.

Economic growth, as measured by annual changes in GDP, has been considerably lower in the Dayton MSA than the United States overall during the past eight years. The Dayton MSA has grown at a 1.1% average annual rate while the United States has grown at a 1.9% rate. As the national economy improves, the Dayton MSA continues to underperform the United States. GDP for the Dayton MSA rose by 0.7% in 2016 while the United States GDP rose by 1.5%.

The Dayton MSA has a per capita GDP of \$44,381, which is 12% less than the United States GDP of \$50,577. This means that Dayton MSA industries and employers are adding relatively less value to the economy than their counterparts in the United States overall.

	(\$ Mil)		(\$ Mil)	
Year	Dayton MSA	% Change	United States	% Change
2009	32,901		14,320,114	
2010	33,007	0.3%	14,628,165	2.2%
2011	33,943	2.8%	14,833,679	1.4%
2012	34,375	1.3%	15,126,281	2.0%
2013	34,554	0.5%	15,348,034	1.5%

Source: Bureau of Economic Analysis and Economy.com; data released September 2016. The release of state and local GDP data has a longer lag time than national data. The data represents inflation-adjusted "real" GDP stated in 2009

Flying Fortress

Despite recent softness, public sector and allied defense contractor employment will advance quickly over the next couple of years, driven by rising federal defense spending. Hiring at Wright-Patterson Air Force Base will accelerate as demand for unmanned aerial vehicle research and development rises. The Air Force Research Laboratory at the base is aggressively issuing contracts for UAVs as well as directly collaborating with manufacturers. For example, the laboratory issued a \$41 million contract to drone manufacturer Kratos to develop a low-cost, small and disposable stealth UAV. The aircraft will substitute for more expensive manned vehicles such as the F-22 and F-35, resulting in significant cost savings.

Wright-Patterson

Wright Patterson is also developing technology related to stealth capabilities, electronic jet controls, and cybersecurity. The base has expanded its Center for CyberSpace Research to protect critical civilian and military infrastructure nationwide. The allied Air Force Institute of Technology graduates 700 cybersecurity specialists annually, and surrounding defense contractors focusing on cybersecurity R&D have benefited.

Healing Up

Despite the hiccup in health services job growth, providers will again add jobs at a pace in line with the nation over the next two years. Hospitals are expanding facilities in order to keep up with rising demand for general and specialty care. For example, Miami Valley Hospital is breaking ground on a \$60 million expansion that will include a spine and joint center, sports medicine facilities, and a pain management services center. Dayton Children's Hospital will finish a \$140 million expansion this year, including an eight-story patient tower, boosting hiring of nurses and doctors.

Gearing Down

Local factories' hot streak will soon come to an end as weakness in steel and vehicle manufacturing pushes total manufacturing payrolls lower in 2018 and 2019. Steel manufacturing employment has been temporarily bolstered by countervailing duties enacted on imports in mid-2016, but this benefit will wane. Continued global oversupply spurred by overcapacity in East Asia will send steel prices lower, weighing on local producers. Hiring at local auto manufacturers will slow to a trickle over the next couple of years as national vehicle sales slacken. Pent-up U.S. auto demand has been exhausted and low gasoline prices and cheap auto financing have already provided their maximum advantage.

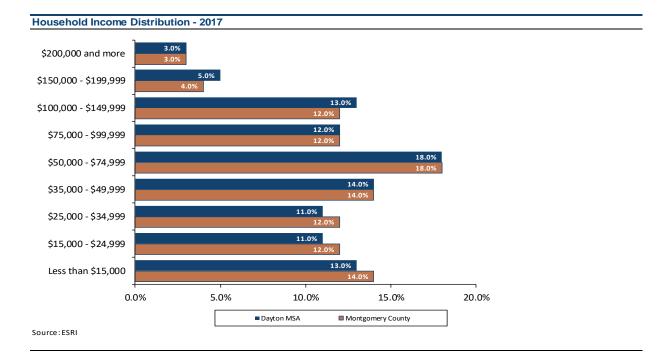

Household Income

The Dayton MSA has a higher level of household income than Montgomery County. Median household income for the Dayton MSA is \$51,136, which is 8.7% greater than the corresponding figure for Montgomery County.

Median Household Income - 2017		
	Median	
Dayton MSA	\$51,136	
Montgomery County	\$47,048	
Comparison of Dayton MSA to Montgomery County	+ 8.7%	
Source: ESRI		

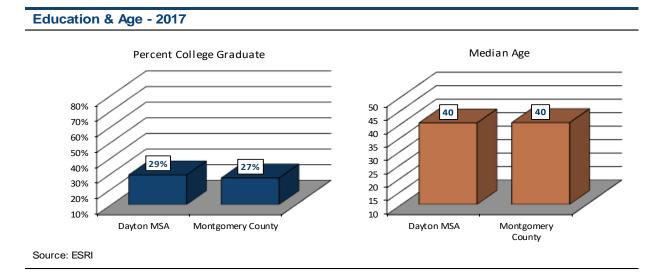

The following chart shows the distribution of households across nine income levels. The Dayton MSA has a greater concentration of households in the higher income levels than Montgomery County. Specifically, 33% of Dayton MSA households are at the \$75,000 or greater levels in household income as compared to 31% of Montgomery County households. A lesser concentration of households is apparent in the lower income levels, as 35% of Dayton MSA households are below the \$35,000 level in household income versus 38% of Montgomery County households.

Education and Age

Residents of the Dayton MSA have a slightly higher level of educational attainment than those of Montgomery County. An estimated 29% of Dayton MSA residents are college graduates with four-year degrees, versus 27% of Montgomery County residents. People in the Dayton MSA are similar in age to their Montgomery County counterparts. The median age of both the Dayton MSA and Montgomery County is 40 years.

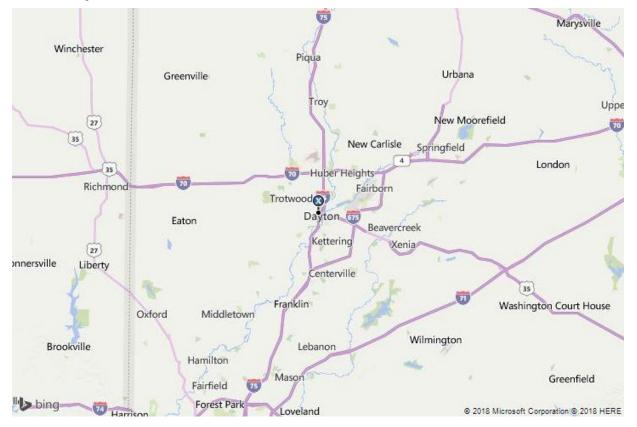

Conclusion

The Dayton MSA economy will be affected by a flat to declining population base and a lower level of median household income. The Dayton MSA experienced a decline in the number of jobs, and had a slightly lower unemployment rate than Montgomery County over the past decade.

Dayton will advance in line with the U.S. over the next couple of years, supported by defense and healthcare even as manufacturing detracts from growth. Nonetheless, Dayton will lag the U.S. in job growth longer term because of a shrinking population. In conclusion, we anticipate that growth in the Dayton MSA economy will be limited, resulting in only a modest level of demand for real estate in general.

Area Map

Surrounding Area

Location

The subject is located in the Central submarket of the City of Dayton.

Access and Linkages

Primary highway access to the area is via Interstate 75, State Route 35 and State Route 4. Public transportation is provided by the Greater Dayton Regional Transit Authority (RTA), and provides access to Montgomery County and western Greene County. Overall, the primary mode of transportation in the area is the automobile.

Demographics

A demographic profile of the surrounding area, including population, households, and income data, is presented in the following table.

	1-Mile Drive	3-Mile Drive	5-Mile Drive		Montgomery	
2017 Estimates	Distance	Distance	Distance	Dayton MSA	County	City of Daytor
Population 2010	13,081	93,307	205,893	799,232	535,153	141,542
Population 2017	12,585	92,210	203, 551	804,387	533,054	140,450
Population 2022	12,686	92,284	203,274	809,390	532,490	140,353

Compound % Change 2017-2022	0.2%	0.0%	0.0%	0.1%	0.0%	0.0%
Households 2010	5,586	37,013	86,211	327,630	223,943	58,411
Households 2017	5,429	36,668	85,556	330,944	223,940	58,109
Households 2022	5,507	36,877	85,717	333,643	224,251	58,272
Compound % Change 2010-2017	-0.4%	-0.1%	-0.1%	0.1%	0.0%	-0.1%
Compound % Change 2017-2022	0.3%	0.1%	0.0%	0.2%	0.0%	0.1%
Median Household Income 2017	\$23,145	\$26,796	\$32,563	\$51,136	\$47,048	\$29,862
Average Household Size	2.1	2.3	2.2	2.4	2.3	2.2
College Graduate %	22%	17%	20%	29%	27%	19%
Median Age	39	34	37	40	40	36
Owner Occupied %	17%	29%	38%	55%	52%	36%
Renter Occupied %	48%	43%	41%	34%	35%	41%
Median Owner Occupied Housing Value	\$79,932	\$71,641	\$80,660	\$135,267	\$120,504	\$76,110
Median Year Structure Built	1940	1944	1952	1966	1964	1949

As shown above, the current population within a 3-mile drive distance of the subject is 92,210, and the average household size is 2.3. Population in the area has declined since the 2010 census, but the trend is projected to be flat over the next five years. This is similar to the trend in Montgomery County, which is also projected to be flat.

Median household income is \$26,796, which is lower than the household income for Montgomery County. Residents within a 3-mile drive distance have a lower level of educational attainment than those of Montgomery County, while median owner occupied home values are lower.

Land Use

The area is suburban in character and approximately 90% developed.

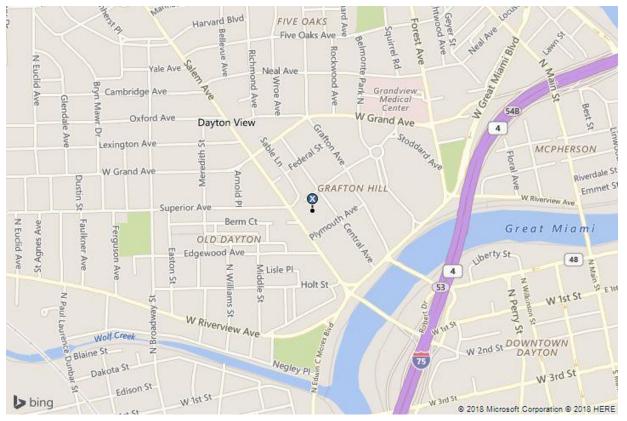

Land uses immediately surrounding the subject are predominantly residential, institutional and commercial with typical ages of buildings being in their mid to late economic lives. Property types adjoining the subject include single family residences and commercial uses.

Outlook and Conclusions

The area is in the mature stage of its life cycle. Recent development activity has been limited. We anticipate that property values will remain stable to decreasing in the near future.

Surrounding Area Map

Multifamily Market Analysis

Although the subject property is improved with a special purpose use, a school, the highest and best use of the property as vacant has been determined as a residential multi-family use.

National Market Overview

The following was taken from the 3Q17 United States Multi-housing Market Overview prepared by ARA, a Newmark Company.

- **Sales Volume** Sales volume for the past 12 months totaled \$148.5 billion with quarterly volume reaching \$39.3 billion, representing an 11.1% quarter-over-quarter increase and 4.0% year-over-year growth. Investors continue to pour capital into top-tier secondary markets such as Atlanta, Dallas, and Denver.
- Cap Rates Cap rates remain flat year-over-year at 5.0% for institutional-quality assets. The third quarter represents the tightest spread between major markets and secondary markets as yield-driven capital continues to flow into secondary and tertiary markets.
- Rent Growth Nationwide rent growth remains flat at 2.3% while still positive. Western metros such as Phoenix, Sacramento, San Diego, and Seattle continue to lead the nation in rent growth as they benefit from strong demographic and economic tailwinds.
- Supply and Demand New supply is anticipated to peak in 2017 with over 389,000 units delivered throughout the United States. This cycle has been heavily weighted toward urban infill and luxury product compared with the previous cycle which was dominated by Class B suburban assets.
- International Capital International capital sales volume rose to \$11.3 billion over the past 12 months. High net worth and sovereign wealth funds are increasingly growing their multihousing portfolios through indirect investment vehicles and joint ventures with domestic sponsors.
- Debt Markets Debt outstanding increased \$21.7 billion to \$1.2 trillion with Agency and GSE lending accelerating 2.5% quarter-over-quarter compared to the broader market of 1.8%. Debt capital remains plentiful for well positioned assets despite a slowdown in the CMBS market.

The following was obtained from the REIS publication "Apartment First Glance" for the third quarter of 2017:

The national vacancy rate increased by 10 basis points in the third quarter, to 4.5%. This is quite in line with expectations for the year, given the large amount of new construction that has been coming online. Reis forecasts call for national vacancies in the high 4s by the end of the year, and if the latest estimates from developers materialize in the fourth quarter, we will likely hit vacancy rates in the 4.6% to 4.8% range by the end of the year.

Asking and effective rents rose by 1.0% and 0.9%, respectively, during the third quarter. While this is a slight deceleration relative to the second quarter, these still represent relatively healthy figures for rent growth. This suggests that demand for apartment units remain relatively strong, even as concessions have made a comeback in the most expensive markets where supply growth has also been ramping up. Overall rent growth in 2017 should be comparable to 2016—still a climb down relative to the banner year of 2015, but hardly a cataclysm.

Where are the Worries? (And When?)

The national picture suggests that vacancies began to rise from about one year ago, but in geographic markets with truly robust supply growth, vacancies had begun to rise from recent cyclical lows as far back as two to three years ago. For example, in Charleston, vacancies began rising as early as mid-2013, from a low of 4.3% to its current 7.0%. Inventory during that time period grew by over 26%. In Washington DC, vacancies began rising in early 2013, from 3.9% to its current 5.9%—inventory growth over that four and a half year period clocked in at close to 17%, with over 15,000 new units opening their doors. However, it is worthwhile to note that vacancies in Washington DC have actually climbed down from recent highs—vacancies declined by 10 basis points in the third quarter, from 6.0%, and in early 2016 actually dipped down to as low as 4.7%, from a recent high of 5.9% in the second quarter of 2015. In other words, supply growth has been pushing vacancies upwards, but in many markets demand has pushed back too whenever there was the slightest lull in deliveries.

New York is a bellwether case of how a market that has enjoyed very low vacancies will deal with historic levels of supply growth. Delays have pushed a lot of projects to 2018, but 2017 will mark the record year for new apartment deliveries in New York City—almost double the last record set back in 1986. Reis expects New York vacancies to peak in the low to mid-6s over the next year or two—vacancy levels that represent historic highs for this market.

Metro Area Overview

The subject is located in the Dayton metro area as defined by REIS. The following section analyzes the multi-family market within the Dayton MSA and its Central submarket.

Within Dayton's metro area, a flood of new apartments has outpaced net absorption during the last four quarters, resulting in increasing vacancy. Around 5,500 apartments are slated for completion in the fourth quarter of 2017 which will put deliveries at levels not seen since 2000. Additions are focused on garden and mid-rise complexes spread throughout the area but there are also several high-rise buildings to be completed in Midtown. Although the influx of supply will increase vacancy, rent growth remains strong and it is setting a record high this year.

2017 development is expected to be the peak of construction during this economic cycle but development is expected to remain heavy into next year. Demographics in the area remain supportive for leasing activity and demand will be catching up with supply. Jobs growth continues as many corporations are moving to, and expanding in, the metro area, bringing higher-wage jobs. Class A complexes will benefit from this jobs growth given the income

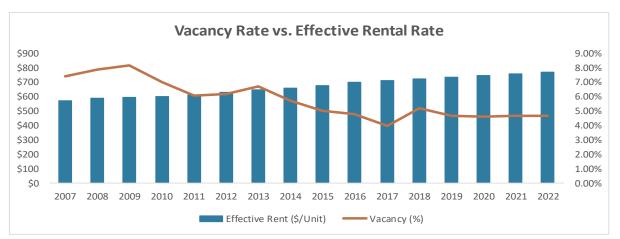

levels. Young professionals seeking a wide range of amenities with access to nearby shopping and entertainment may be willing to pay higher rents as high costs make homeownership out of reach in popular areas.

Supply and demand indicators, including inventory levels, absorption, vacancy, and rental rates for all classes of space are presented in the ensuing table.

							Effective	Effective	Gross
	Inventory	Occupied	Vacancy	Vacancy	Completions	Absorption	Rent	Rental Rate	Revenue

Market Trends Key Takeaways

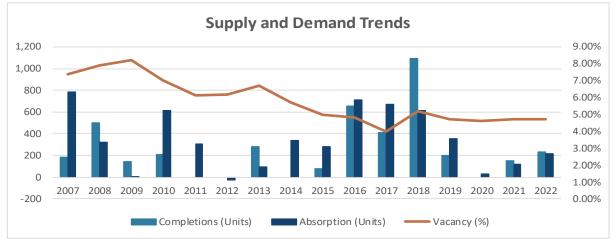

Source: ©Reis Services, LLC 2018. Reprinted with the permission of Reis Services, LLC. All rights reserved.

• The current vacancy rate in the metro area is 4.0%; the vacancy rate has decreased by 220 bps from 2012.

• Four-year forecasts project a 4.7% vacancy rate in the metro area, representing an increase of 70 bps by year end 2022.

Source: ©Reis Services, LLC 2018. Reprinted with the permission of Reis Services, LLC. All rights reserved.

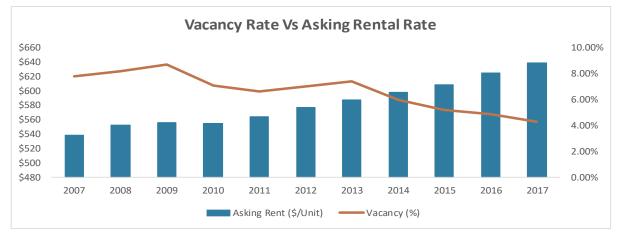

- Inventory in the metro area has increased by 4.2% from 2012, while the occupied stock has increased by 6.6%.
- Between 2012 and 2017, completions have averaged 238 Units annually and reached a peak of 659 Units in 2016.
- Between 2012 and 2017, absorption figures reached a peak of 711 Units in 2016 and a low of -27 Units in 2012.

Class B/C Multifamily Market

The subject is a Class B property as defined by REIS. Supply and demand indicators, including inventory levels, absorption, vacancy, and rental rates for all Class B/C space in the Dayton metro area are presented in the following table.

								Asking	Gross
	Inventory	Occupied	Vacancy	Vacancy	Completions	Absorption	Asking Rent	Rental Rate	Revenue
Year	(Units)	(Units)	(Units)	(%)	(Units)	(Units)	(\$/Unit)	(% Change)	(\$/Unit
2007	22,161	20,439	1,722	7.80%	0	465	\$538	2.50%	\$496

2017	22,161	21,210	951	4.30%	0	130	\$639	2.20%	\$612
2007 - 2017 Average	22,161	20,687	1,474	6.65%	0	112	\$582	1.79%	\$544

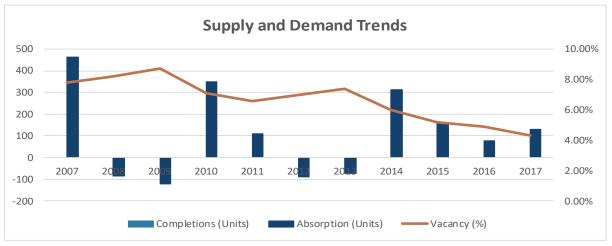

Multifamily Class B/C Market Key Takeaways

Source: ©Reis Services, LLC 2018. Reprinted with the permission of Reis Services, LLC. All rights reserved.

- The current vacancy rate for Class B/C properties in the metro area is 4.3%; the vacancy rate has decreased by 270 bps from 2012.
- Asking rent currently averages \$639/Unit and has increased by 10.7% from 2012.

Source: ©Reis Services, LLC 2018. Reprinted with the permission of Reis Services, LLC. All rights reserved.

- Class B/C metro area inventory has remained constant from 2012, while the occupied stock has increased by 3.0%.
- There have not been any Class B/C completions in the metro area between 2012 and 2017.
- Between 2012 and 2017, absorption figures reached a peak of 314 Units in 2014 and a low of -88 Units in 2012.
- Between 2012 and 2017, gross revenue for Class B/C properties in the metro area averaged \$571/Unit and has increased by 12.3%.

Submarket Overview

The subject is located in the Central Dayton submarket. In order to evaluate the market appeal of the subject's submarket in comparison to others in the Dayton metro area, we compare key supply and demand indicators for all classes of space in the ensuing table.

	Inventory	Inventory	Asking Rent		Free Rent	Expenses
Submarket	(Buildings)	(Units)	(\$/Unit)	Vacancy (%)	(mos)	(%
Miami County	18	1,342	\$634	4.20%	0.80	46.20%
Northeast	47	8,001	\$807	2.40%	0.50	45.10%
Northwest	33	4,367	\$684	2.60%	0.42	45.10%
South	74	12,498	\$793	4.70%	0.26	45.10%

Central Dayton Submarket Snapshot

• The submarket contains 23.3% of the metro building inventory and 19.1% of the metro unit inventory.

- The submarket's asking rent is \$659/Unit which is less than the metro average of \$696/Unit.
- The submarket's vacancy rate is 5.30% which is greater than the metro average of 4.00%.
- Operating expenses, as a percent of potential rent revenue, average 45.9% in the submarket compared to 45.7% for the overall metro area.
- Average free rent in the subject property's submarket is greater than the free rent for the metro area.

In comparison to other submarkets in the region, the Central Dayton submarket is rated as follows:

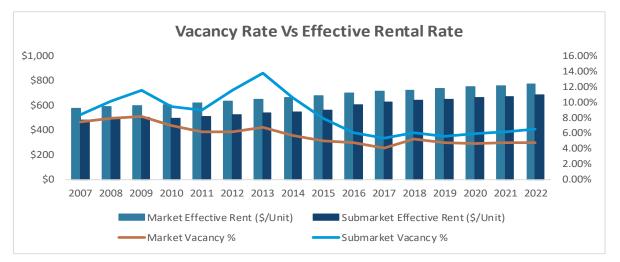

Submarket Attribute Ratir	gs	
Market Size/Stature	Average	
Market Demand	Stable	
Vacancy Trends	Decreasing	
Threat of New Supply	Average	
Rental Trends	Increasing	

Submarket Analysis

Supply and demand indicators for all classes of space in the Central Dayton submarket are displayed in the following table.

Central Dayton Submarket Class B/C Trends Key Takeaways

Source: ©Reis Services, LLC 2018. Reprinted with the permission of Reis Services, LLC. All rights reserved.

- The current vacancy rate for Class B/C properties in the submarket is 4.8%; the vacancy rate has decreased by 750 bps from 2012.
- Asking rent currently averages \$585/Unit and has increased by 16.8% from 2012.

Source: @Reis Services, LLC 2018. Reprinted with the permission of Reis Services, LLC. All rights reserved.

- Class B/C inventory in the submarket has remained constant from 2012, while the occupied stock has increased by 8.5%.
- There have not been any Class B/C completions in the submarket between 2012 and 2017.
- Between 2012 and 2017, absorption figures reached a peak of 208 Units in 2014 and a low of -142 Units in 2012.
- Between 2012 and 2017, gross revenue for Class B/C properties in the submarket averaged \$487/Unit and has increased by 28.0%.

New and Proposed Construction

The following table summarizes properties that are under construction, planned, and/or proposed in the subject's metro area.

Dayton Multifamily Construction by Phase and Subtype

Multifamily Market Construction Key Takeaways

• There are 12 properties under construction, 8 properties in the planned construction phase, and 9 properties in the proposed construction phase in the metro area.

- Apartment properties within the under construction phase have an average size of 161 units and range in size between 32 units and 312 units.
- Apartment properties within the planned construction phase have an average size of 136 units and range in size between 40 units and 298 units.
- Apartment properties within the proposed construction phase have an average size of 73 units and range in size between 58 units and 114 units.
- Of the 1,638 units under construction, 98.1% are Apartment properties, 0.0% are Condominium properties, and 1.9% are Townhome properties.
- Of the 717 units planned for construction, 75.6% are Apartment properties, 4.5% are Condominium properties, and 0.0% are Townhome properties.
- Of the 723 units proposed for construction, 50.5% are Apartment properties, 40.4% are Condominium properties, and 0.0% are Townhome properties.

The following table summarizes properties that are under construction, planned, and/or proposed in the subject's submarket.

Central Dayton Submarket Construction by Phase and Subtype								
Multifamily Subproperty	Under Construction		Planned Co	nstruction	Proposed Construction			
Туре	Properties	Units	Properties	Units	Properties	Units		
Apartment	3	296	3	244	1	60

New supply additions will directly impact the subject in terms of competitive space.

Multifamily Market Outlook and Conclusions

Relevant vacancy rate indications are summarized as follows:

Vacancy Rate Indications	
Market Segment	Vacancy Rates
Dayton Metro Area	4.0%
Dayton Metro Area Class B/C	4.3%
Central Dayton Submarket Area	5.3%
Central Dayton Submarket Area Class B/C	4.8%
Directly Comparable Properties	4.9%
Subject Property - Current	5.0%

Based on the key metro and submarket area trends, construction outlook, and the performance of competing properties, NKF expects the mix of property fundamentals and economic conditions in the Dayton metro area to have a neutral impact on the subject

property's performance in the near-term. The site is well positioned due to its proximity to Dayton's CBD and the Miami River, as well as the current residential characteristics of the neighborhood. Commercial and retail uses resulting in a mixed-use type of development would be well suited for the site given its frontage along Salem Avenue and the proximity to residential uses to the north and west areas.

Property Analysis

We are not experts in the interpretation of zoning ordinances. An appropriately qualified land use attorney should be engaged if a determination of compliance with zoning is required.

Easements, Encroachments and Restrictions

We were not provided a current title report to review. We are not aware of any easements, encroachments, or restrictions that would adversely affect value. Our valuation assumes no adverse impacts from easements, encroachments, or restrictions, and further assumes that the subject has clear and marketable title.

Conclusion of Land Analysis

Overall, the physical characteristics of the site and the availability of utilities result in functional utility suitable for a variety of uses including those permitted by zoning. We are not aware of any other particular restrictions on development.

GIS Map

Improvements Description and Analysis

The subject is an existing special purpose - former public school property containing 75,512 square feet of gross building area. The improvements were constructed in 1920/1950 and are 100% vacant as of the effective appraisal date. The site area is 3.7389 acres or 162,866 square feet. The subject was occupied by the Longfellow Alternative High School until summer 2017.

Improvements Analysis

Quality and Condition

The quality and condition of the subject is considered to be inferior to that of competing properties. Extensive deferred maintenance and functional obsolescence of the improvements places the subject on an inferior position.

Functional Utility

The improvements appear to be somewhat suited to their current use. There appear to be items of functional obsolescence resulting from the inclusion of various additional structures over the years to meet the school capacity needs.

Deferred Maintenance

Deferred maintenance is identified based on our inspection. Some of the deferred maintenance items include: the burst of water pipes due to freezing weather conditions, the extensive ceiling damage from roof leaks in some areas and falling brick in one of the first floor hallways.

ADA Compliance

Based on our inspection and information provided, we are not aware of any ADA issues. However, we are not expert in ADA matters, and further study by an appropriately qualified professional would be recommended to assess ADA compliance.

Hazardous Substances

An environmental assessment report was not provided for review and environmental issues are beyond our scope of expertise. No hazardous substances were observed during our inspection of the improvements; however, we are not qualified to detect such substances. Unless otherwise stated, we assume no hazardous conditions exist on or near the subject.

Personal Property

No personal property items were observed that would have any material contribution to market value.

Conclusion of Improvements Analysis

In comparison to other competitive properties in the region, the subject improvements are rated as follows:

Improvements Ratings	
Access	Average
Visibility/Exposure	Average
Design and Appearance	Average
Age/Condition	Below Average
% Sprinklered	Below Average
Interior Amenities	Below Average
Floor to ceiling heights	Average
Elevators	Below Average
Bathrooms	Below Average
Kitchens	Below Average
Parking Ratios	Below Average
Distance of Parking to Building Access	Average
Landscaping	Below Average
Occupancy	Below Average

Overall, the quality, condition, and functional utility of the improvements are below average for their age and location. The improvements were built in the early 1900s but face extensive deferred maintenance as well as needed updates for today's educational system.

Real Estate Taxes

Real Estate taxes in Ohio are based upon assessed value, which is meant to represent 35% of true value, that to be somewhat synonymous with market value as determined by the County Auditor. The gross tax rate is expressed in millage, and then is subject to different reduction factors to arrive at an effective tax rate. Real estate taxes and assessments for the current tax year are shown in the following table:

Taxes and Assessments - 2017							
	Assessed Value				Taxes and Assessments		
					Ad		
					Valorem	Direct	
Tax ID	Land	Improvements	Total	Tax Rate	Taxes	Assessments	Total
R72 06504 0001	\$49,780	\$937,990	\$987,770	10.979000%	\$0	\$3,695	\$3,695

R72 06504 0058	\$90	\$220	\$310	10.979000%	\$0	\$1	\$1
	\$70,750	\$944,910	\$1,015,660	· · ·	\$0	\$3,744	\$3,744

The local assessor's methodology for valuation is typically based upon cost or sales. The property is assessed on a fee simple basis.

The subject is owned by the Dayton Board of Education, therefore, the property is exempt from real estate taxes. While the subject property is exempt from paying real estate taxes, it is still subject to special assessments.

The table below demonstrates the current market value assessment by the County Auditor:

Assessor's Market Value			
Tax ID	Land	Improvements	Total
R72 06504 0001	\$142,230	\$2,679,960	\$2,822,190
R72 06504 0013	\$22,440	\$0	\$22,440
R72 06504 0018	\$6,760	\$900	\$7,660
R72 06504 0019	\$5,600	\$270	\$5,870
R72 06504 0020	\$5,600	\$710	\$6,310
R72 06504 0021	\$5,600	\$1,690	\$7,290
R72 06504 0022	\$5,600	\$8,890	\$14,490
R72 06504 0023	\$5,600	\$5,190	\$10,790
R72 06504 0034	\$1,500	\$850	\$2,350
R72 06504 0057	\$940	\$620	\$1,560

	\$202,120	\$2,699,700	\$2,901,820

Delinquency

According to the local tax assessor/collector/treasurer, there are no reported delinquent taxes for the subject.

Subject Tax Conclusion

Based on the concluded market value for the subject, the assessed value appears high. The subject property is over-assessed based on this appraisal.

Ad Valorem Tax Analysis					
	Subject	Conclusion			
	2017				
Primary Tax ID Number	R72 06504 0001	R72 06504 0001			
Total Assessed Value	\$1,015,660	\$80,500			
Assessed Value/SF	13.45031253	1.066055726			
Special Assessments	\$3,744	\$3,744			
Tax Rate	\$.00 / \$1,000	\$109.79 / \$1,000			
Actual / Pro Forma Taxes	\$3,744	\$12,583			
Noted Tax Delinquencies	None Reported	None Reported			
Tax Exemptions or Abatements	None Noted	None Noted			

Although the property is currently tax exempt, a potential buyer is likely not to receive the exemption. Therefore, the estimated taxes based on the Market Value determined in the sales comparison approach has been included within the table above to properly reflect the actions of the marketplace.

Highest and Best Use

As Vacant

The site is zoned MMF - MNC, Mature Multi-Family & Mature Neighborhood Commercial Districts. Permitted uses include single-family, two-family and multi-family dwellings; family daycare homes for 1-6 children; residential facilities for up to 8 persons; libraries; churches; administrative and professional offices; restaurants and retail establishments.. To our knowledge, there are no other legal restrictions such as easements or deed restrictions that would effectively limit the use of the property.

The subject site contains 162,866 square feet or 3.7389 acres and is adequately served by utilities, has an adequate shape and size, sufficient access, etc., to be a separately developable site. The subject site would support a site layout for any of the legally probable uses, which include multifamily residential use and other similar uses. There are no known physical reasons why the subject site would not support any of these legally probable developments.

The determination of financial feasibility is dependent primarily on the relationship of supply and demand for the legally permissible and physically possible land uses versus the cost to create the uses. As discussed in the Market Analysis section of this report:

- The subject's immediate trade area is showing elevated vacancy rates versus historical trends
- There has been little or no new development
- Given these factors, it appears that multifamily use would have a value commensurate with its cost

Based on our analysis of the market, there is currently adequate demand for residential uses in the subject's area. It appears that a multifamily residential use on the site would have a value commensurate with its cost. Therefore, multifamily residential use is considered to be financially feasible.

The final test of highest and best use of the site as though vacant is that the use be maximally productive, yielding the highest returns to the land. In the case of the subject as if vacant, the analysis has indicated that development of the site for multifamily residential use would be most appropriate.

Based on the preceding analysis and upon information and analysis contained in the area, neighborhood, and market analyses, the highest and best use as vacant would be multifamily residential use. Sufficient demand exists for development to occur in the near term. Our analysis of the subject and market yields the conclusion that the most likely buyer, as if vacant, would be an investor (land speculation) or developer.

As Improved

Legally Permissible

The subject site is improved with a school property, which is consistent with the legal restrictions of the site. The improvements currently do not meet the market's expectations for a school and includes extensive deferred maintenance as well as significant functional obsolescence.

Financially Feasible

The financial feasibility for a school property is limited, based on the amount of rent that can be generated, less operating expenses required to generate that income. Further, the value of the property as improved exceeds the underlying land value minus demolition cost, implying that removal of the improvements and redevelopment of the site is not indicated.

Based on this analysis, the highest and best use of the subject property as improved is for the improvements to remain and likely be repositioned. Other alternative uses would include residential multi-family uses which would produce a higher net income and/or value over time than the current use. Although conversion of the subject's improvements to an alternative use would not be cost effective due to the extensive need of repairs and updates, it would still be more financially feasible than razing the improvements and market the site as vacant land.

Valuation

Land Valuation

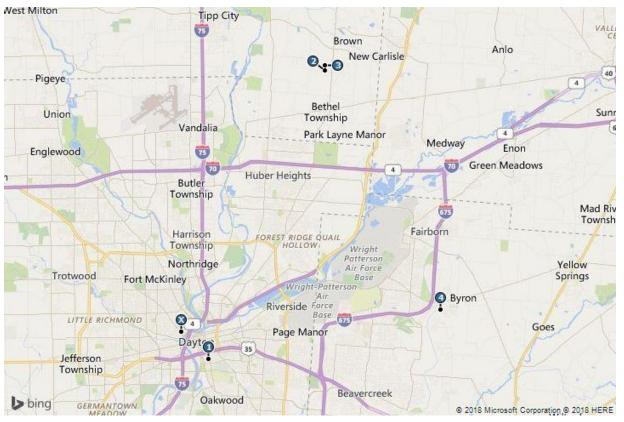

To develop an opinion of the subject's land value, as if vacant and available to be developed to its highest and best use, we utilize the sales comparison approach. Our search for comparable sales focused on transactions within the following parameters:

- Location: Dayton MSA
- Size: 1 Acre to 15 Acres
- Use: Residential Multi-Family
- Transaction Date: January 1, 2015 to current

For this analysis, we use price per acre as the appropriate unit of comparison because market participants typically compare sale prices and property values on this basis. The most relevant sales are summarized in the following table.

Date; SF; \$/SF		nmary of Comparable Land Sales	Sale

Sale 1 Warren Street Vacant Land

Sale 3 Waterstone at Carriage Trails Multi-Family Land

Sale 2 The Harrison Apartments Multi-Family Land

Sale 4 Fairfield Oakes Multi-Family Land

Analysis and Adjustment of Sales

The sales are compared to the subject and adjusted to account for material differences that affect value. Adjustments are considered for the following factors, in the sequence shown below.

Adjustment Factor	Accounts For	Comments
Effective Sale Price	Atypical economics of a transaction, such as demolition cost or expenditures by buyer at time of purchase.	No adjustments deemed necessary.
Real Property Rights	Fee simple, leased fee, leasehold, partial interest, etc.	No adjustments deemed necessary.
Financing Terms	Seller financing, or assumption of existing financing, at non-market terms.	No adjustments deemed necessary.
Conditions of Sale	Extraordinary motivation of buyer or seller, assemblage, forced sale.	No adjustments deemed necessary.
Market Conditions	Changes in the economic environment over time that affect the appreciation and depreciation of real estate.	Sale Comparable 2 was considered to have transferred in a time inferior to the effective date of the appraisal and has been adjusted upward to account for the difference. Sale Comparable 4 was considered to have transferred in a time inferior to the effective date of the appraisal and has been adjusted upward to account for the difference.
Location	Market or submarket area influences on sale price; surrounding land use influences.	Sale Comparable 4 has been adjusted upward due to inferior demographic characteristics in comparison to the subject property.
Access/Exposure	Convenience to transportation facilities; ease of site access; visibility; traffic counts.	Sale Comparable 1 has been adjusted upward due to having inferior exposure in comparison to the subject property. Sale Comparable 2 has been adjusted upward due to having inferior exposure in comparison to the subject property. Sale Comparable 3 has been adjusted upward due to having inferior exposure in comparison to the subject. Sale

Adjustment Factor	Accounts For	Comments
		Comparable 4 has been adjusted upward due to having inferior exposure in comparison to the subject property.
Size	Inverse relationship that often exists between parcel size and unit value.	Sale Comparable 1 has been adjusted downward due to its smaller size in comparison to the subject property. Sale Comparable 2 has been adjusted upward due to its larger size in comparison to the subject property. Sale Comparable 3 has been adjusted upward due to its larger size in comparison to the subject property. Sale Comparable 4 has been adjusted upward due to its larger size in comparison to the subject property.
Shape and Topography	Primary physical factors that affect the utility of a site for its highest and best use.	No adjustments deemed necessary.
Zoning	Government regulations that affect the types and intensities of uses allowable on a site.	No adjustments deemed necessary.
Entitlements	The specific level of governmental approvals attained pertaining to development of a site.	No adjustments deemed necessary.

The following table summarizes the adjustments we make to each sale.

Range of Adjusted Prices		\$65,347 - \$96,959			
Average		\$76,902			

Land Value Conclusion

Prior to adjustment, the sales reflect a range of \$50,002 - \$82,256 per acre. After adjustment, the range is narrowed to \$65,347 - \$96,959 per acre, with an average of \$76,902 per acre. We give greatest weight to sales 1 and 3, and arrive at a land value conclusion as follows:

Land Value Conclusion				
Indicated Value per Acre	\$80,000			
Subject Acres	3.7389			
Indicated Value	\$299,112			
Rounded	\$300,000			

Cost Approach

When we compare the value of the subject improvements, concluded in the sales comparison approach, to the value of the land, we observe that the value of the land is higher. Therefore, we need to determine if the highest and best use of the property is to be vacant or improved. For this purpose, we utilized the cost approach. This method implies that if the improvements were to be removed, an estimate of the demolition costs of the current improvements needs to be determined. On a second step, these demolition costs are subtracted from the land value. Based on the Marshall Valuation Survey, the type of improvements and its adjustments for time and region; we concluded the following demolition cost per square foot of improvements:

Building 1 Name:	Former Longfellow High School			
MVS Building Type:	High and Alternative Schools	Unit	SF Current Multiplier	1.070
Const Class:	С	Unit Cost	\$5.36 Local Multiplier	0.980
Section/Page	66/11	Other:	\$0.00	
Economic Life	45	Subtotal:	\$5.36 Final Unit Cost	\$5.62

Cost Approach Conclusion

Based on the above estimate, we deducted the demolition cost from the upper and lower range of the land value. The table below summarizes the process.

Value Indication Assuming Demolition					
		Maximum	Minimum		
Indicated Land Value (As if Vac	ant)				
Sale Price (\$/Acre)	3.7389	\$90,000	\$70,000		
Indicated Land Value (As if	\$336,501	\$261,723			
Less: Indicated Demolition Cos	ts				
\$5.62/SF	75,512	\$424,377	\$424,377		
Implied As Is Value	_	-\$87,876	-\$162,654		

Since the value of the property as vacant is negative, we can conclude that that the existing improvements contribute to the total market value of the subject, over and above the underlying land value less demolition costs.

Based on this analysis, the highest and best use of the subject property as improved is for the improvements to remain and likely be repositioned.

Sales Comparison Approach

The sales comparison approach develops an indication of value by comparing the subject to sales of similar properties. The steps taken to apply this approach are:

- Identify relevant property sales;
- Research, assemble, and verify pertinent data for the most relevant sales;
- Analyze the sales for material differences in comparison to the subject;
- Reconcile the analysis of the sales into a value indication for the subject.

To apply the sales comparison approach, we searched for sale transactions within the following parameters:

- Property Type: Schools Uses
- Location: Dayton, Cincinnati and Columbus MSAs
- Size: 20,000 SF to 125,000 SF
- Transaction Date: January 1, 2015 to current

For this analysis, we use price per square foot of rentable area as the appropriate unit of comparison because market participants typically compare sale prices and property values on this basis. The most relevant sales are summarized in the following table.

	nmary of Comparabl			Aaroos	Dran Classe	-	-

Analysis and Adjustment of Sales

Adjustment Factor	Accounts For	Comments
Effective Sale Price	Atypical economics of a transaction, such as excess land or non-realty components.	No adjustments deemed necessary.
Real Property Rights	Leased fee, fee simple, leasehold, partial interest, etc.	No adjustments deemed necessary.
Financing Terms	Seller financing, or assumption of existing financing, at non-market terms.	No adjustments deemed necessary.
Conditions of Sale	Extraordinary motivation of buyer or seller.	No adjustments deemed necessary.
Market Conditions	Changes in the economic environment over time that affect the appreciation and depreciation of real estate.	No adjustments deemed necessary.
Location	Market or submarket area influences on sale price; surrounding land use influences.	Sale Comparable 1 has been adjusted upward due to inferior demographics in comparison to the subject. Sale Comparable 2 has been adjusted upward due to inferior demographic characteristics in comparison to the subject. Sale Comparable 3 has been adjusted downward due to its proximity to the Ohio River and its demographic differences. Sale Comparable 4 has been adjusted downward due to superior demographics in comparison to the subject. Sale Comparable 5 has been adjusted downward due to superior demographics in comparison to the subject.

Adjustment Factor			Accounts For	Comments		
Access/Ex	posure	1	Convenience to transportation facilities; ease of site access; visibility; traffic counts.	Sale Comparable 3 has been adjusted downward due to having superior exposure in comparison to the subject property. Sale Comparable 4 has been adjusted downward due to having superior exposure in comparison to the subject property. Sale Comparable 5 has been adjusted downward due to having superior exposure in comparison to the subject property.		
Size			Inverse relationship that often exists between building size and unit value.	Sale Comparable 1 has been adjusted downward due to its smaller size in comparison to the subject property. Sale Comparable 2 has been adjusted upward due to its larger size in comparison to the subject property. Sale Comparable 3 has been adjusted downward due to its smaller size in comparison to the subject property. Sale Comparable 4 has been adjusted downward due to its smaller size in comparison to the subject property. Sale Comparable 5 has been adjusted downward due to its smaller size in comparison to the subject property.		
Parking			Ratio of parking spaces to building area.	No adjustments deemed necessary.		
Building Ratio	to L	_and	Ratio of building area to land area; also known as floor area ratio (FAR).	Sale Comparable 1 has been adjusted slightly downward due to its lower FAR ratio in comparison to the subject property. Sale Comparable 2 has been adjusted slightly upward due to its higher FAR ratio in comparison to the subject property.		

Adjustment Factor	Accounts For	Comments
Building Quality	Construction quality, amenities, market appeal, functional utility.	Sale Comparable 1 was adjusted upward as it was considered of lower construction quality in comparison to the subject. Sale Comparable 2 was adjusted upward as it was considered of lower construction quality in comparison to the subject.
Age/Condition	Effective age; physical condition.	Sale Comparable 4 was adjusted downward due to its superior physical condition in comparison to the subject property. Sale Comparable 5 was adjusted downward due to its superior physical condition in comparison to the subject property.
Economic Characteristics	Non-stabilized occupancy, above/below market rents, and other economic factors.	No adjustments deemed necessary.

The following table summarizes the adjustments we make to each sale.

Value Indication

Prior to adjustment, the sales reflect a range of \$1.39 - \$5.59 per square foot. After adjustment, the range is narrowed to \$1.84 - \$3.64 per square foot, with an average of \$2.90 per square foot. We give greatest weight to sales 1 and 2, and arrive at a value indication as follows:

Value Indication by Sales Compariso	n
Indicated Value per SF	\$3.00
Subject Square Feet	75,512
Indicated Value	\$226,536
Rounded	\$230,000

Reconciliation and Conclusion of Value

The values indicated by our analyses are as follows:

Summary of Value Indications	
Cost Approach	-\$125,265
Sales Comparison Approach	\$230,000
Income Capitalization Approach	Not Used
Land Value	\$300,000
Reconciled	\$230,000

Value Conclusion

Appraisal Premise	Interest Appraised	Date of Value	Value Conclusion
Market Value	Fee Simple	February 6, 2018	\$230,000

Extraordinary Assumptions and Hypothetical Conditions

The value conclusions are not subject to any extraordinary assumptions that may affect the assignment results. An extraordinary assumption is uncertain information accepted as fact. If the assumption is found to be false as of the effective date of the appraisal, we reserve the right to modify our value conclusions. No extraordinary assumptions were necessary.

The value conclusions are not based on any hypothetical conditions that may affect the assignment results. A hypothetical condition is a condition contrary to known fact on the effective date of the appraisal but is supposed for the purpose of analysis. No hypothetical conditions were necessary.

Exposure Time

Exposure time is the length of time the subject property would have been exposed for sale in the market had it sold on the effective valuation date at the concluded market value. Based on the concluded market value stated previously, it is our opinion that the probable exposure time is 24 or less months.

Marketing Period

Marketing time is an estimate of the amount of time it might take to sell a property at the concluded market value immediately following the effective date of value. We estimate the subject's marketing period at 24 or less months.

Assumptions and Limiting Conditions

The Appraisal contained in this Report (herein "Report") is subject to the following assumptions and limiting conditions:

- 1. Unless otherwise stated in this report, title to the property which is the subject of this report (herein "Property") is assumed to be good and marketable and free and clear of all liens and encumbrances and that there are no recorded or unrecorded matters or exceptions to title that would adversely affect marketability or value. No responsibility is assumed for the legal description, zoning, condition of title or any matters which are legal in nature or otherwise require expertise other than that of a professional real estate appraiser. This report shall not constitute a survey of the Property.
- 2. Unless otherwise stated in this report, it is assumed: that the improvements on the Property are structurally sound, seismically safe and code conforming; that all building systems (mechanical/electrical, HVAC, elevator, plumbing, etc.) are in good working order with no major deferred maintenance or repair required; that the roof and exterior are in good condition and free from intrusion by the elements; that the Property and improvements conform to all applicable local, state, and federal laws, codes, ordinances and regulations including environmental laws and regulations. No responsibility is assumed for soil or subsoil conditions or engineering or structural matters. The Property is appraised assuming that all required licenses, certificates of occupancy, consents, or other legislative or administrative authority from any local, state, or national government or private entity or organization have been or can be obtained or renewed for any use on which the value estimates contained in this report is based, unless otherwise stated. The physical condition of the Property reflected in this report is solely based on a visual inspection as typically conducted by a professional appraiser not someone with engineering expertise. Responsible ownership and competent property management are assumed.
- 3. Unless otherwise stated in this report, this report did not take into consideration the existence of asbestos, PCB transformers or other toxic, hazardous, or contaminated substances or underground storage tanks, or the cost of encapsulation, removal or remediation thereof. Real estate appraisers are not qualified to detect such substances. The presence of substances such as asbestos, urea formaldehyde foam insulation, contaminated groundwater or other potentially hazardous materials and substances may adversely affect the value of the Property. Unless otherwise stated in this report, the opinion of value is predicated on the assumption that there is no such material or substances at, on or in the Property.
- 4. All statements of fact contained in this report as a basis of the analyses, opinions, and conclusions herein are true and correct to the best of the appraiser's actual knowledge and belief. The appraiser is entitled to and relies upon the accuracy of information and material furnished by the owner of the Property or owner's representatives and on information and data provided by sources upon which members of the appraisal profession typically rely and that are deemed to be reliable by such members. Such information and data obtained from third party sources are assumed to be reliable and have not been independently verified. No warranty is made as to the accuracy of any

74

of such information and data. Any material error in any of the said information or data could have a substantial impact on the conclusions of this Report. The appraiser reserves the right to amend conclusions reported if made aware of any such error.

- 5. The opinion of value stated in this report is only as of the date of value stated in this report. An appraisal is inherently subjective and the conclusions stated apply only as of said date of value, and no representation is made as to the effect of subsequent events. This report speaks only as of the date hereof.
- 6. Any projected cash flows included in the analysis are forecasts of estimated future operating characteristics and are predicated on the information and assumptions contained within this report. Any projections of income, expenses and economic conditions utilized in this report are not predictions of the future. Rather, they are estimates of market expectations of future income and expenses. The achievement of any financial projections will be affected by fluctuating economic conditions and is dependent upon other future occurrences that cannot be assured. Actual results may vary from the projections considered herein. There is no warranty or assurances that these forecasts will occur. Projections may be affected by circumstances beyond anyone's knowledge or control. Any income and expense estimates contained in this report are used only for the purpose of estimating value and do not constitute predictions of future operating results.
- 7. The analyses contained in this report may necessarily incorporate numerous estimates and assumptions regarding Property performance, general and local business and economic conditions, the absence of material changes in the competitive environment and other matters. Some estimates or assumptions, however, inevitably will not materialize, and unanticipated events and circumstances may occur; therefore, actual results achieved during the period covered by the analysis will vary from estimates, and the variations may be material.
- 8. All prospective value opinions presented in this report are estimates and forecasts which are prospective in nature and are subject to considerable risk and uncertainty. In addition to the contingencies noted in the preceding paragraphs, several events may occur that could substantially alter the outcome of the estimates such as, but not limited to changes in the economy, interest rates, capitalization rates, behavior of consumers, investors and lenders, fire and other physical destruction, changes in title or conveyances of easements and deed restrictions, etc. In making prospective estimates and forecasts, it is assumed that conditions reasonably foreseeable at the present time are consistent or similar with the future.
- 9. The allocations of value for land and improvements must not be used in conjunction with any other appraisal and are invalid if so used. This report shall be considered only in its entirety. No part of this report shall be utilized separately or out of context.
- 10. Neither all nor any part of the contents of this report (especially any conclusions as to value, the identity of the appraiser, or any reference to the Appraisal Institute) shall be disseminated through advertising media, public relations media, news media or any other means of communication (including without limitation prospectuses, private offering memoranda and other offering material provided to prospective investors) without the prior written consent of the Firm. Possession of this report, or a copy hereof, does not carry with it the right of publication.

- 11. Client and any other Intended User identified herein (should consider this report and the opinion of value contained herein as only one factor together with its own independent considerations and underwriting guidelines in making any decision or investment or taking any action regarding the Property. Client agrees that Firm shall not be responsible in any way for any decision of Client or any Intended User related to the Property or for the advice or services provided by any other advisors or contractors. The use of this report and the appraisal contained herein by anyone other than an Intended User identified herein, or for a use other than the Intended User identified herein, is strictly prohibited. No party other than an Intended User identified herein.
- 12. Unless otherwise stated in the agreement to prepare this report, the appraiser shall not be required to participate in or prepare for or attend any judicial, arbitration, or administrative proceedings.
- 13. The Americans with Disabilities Act (ADA) became effective January 26, 1992. No survey or analysis of the Property has been made in connection with this report to determine whether the physical aspects of the improvements meet the ADA accessibility guidelines. No expertise in ADA issues is claimed, and the report renders no opinion regarding the Property's compliance with ADA regulations. Inasmuch as compliance matches each owner's financial ability with the cost to cure the non-conforming physical characteristics of a property, a specific study of both the owner's financial ability and the cost to cure any deficiencies would be needed for the Department of Justice to determine compliance.
- 14. Acceptance and/or use of this report constitutes full acceptance of these Assumptions and Limiting Conditions and any others contained in this report, including any Extraordinary Assumptions and Hypothetical Conditions, and is subject to the terms and conditions contained in the agreement to prepare this report and full acceptance of any limitation of liability or claims contained therein.

KELLY M. FRIED, MAI

Senior Vice President

Newmark Knight Frank 300 E-Business Way Suite 200 Cincinnati, OH 45241 Kelly.Fried@ngkf.com T 513.247.6147 M 513.256.1253

Years of Experience

17 Years

Areas of Specialization

- Valuation of Retail, Office, Industrial, Multi-Family, Urban Redevelopment Projects and Mixed-Use Assets for Lending
- Property Tax Appeal and Expert Witness Testimony

Professional Background

Kelly Fried, MAI, joined Newmark Knight Frank's Valuation & Advisory in 2018 as a senior vice president in the Cincinnati office. As the co-team leader for the Southwest Ohio area, Ms. Fried is responsible for providing outstanding service to clients as well as preparing and reviewing appraisal reports. Since beginning her career in 2001, Ms. Fried has worked with clients on a variety of property types including retail, office, industrial, complex mixed-use developments, urban redevelopment projects, multi-family, medical facilities, land and special-use assets. She has also provided valuation and consulting services on federal and historical tax credits, tax increment financing (TIF) and a variety of tax abatements. Additionally, Ms. Fried has significant experience in litigation assignments, including the preparation of appraisals and providing expert witness testimony. She has also testified as an expert witness in a number of ad valorem tax appeal cases before the Ohio Board of Tax Appeals and before many of Ohio's 88 counties.

Prior to Newmark Knight Frank, Ms. Fried served as a senior vice president for the Gem Real Estate Advisory Group. She rejoined Gem in 2010 after serving with the company from 2001 to 2004. During her first three years with that firm, Ms. Fried provided valuation and consulting services to a broad range of clients and participated as an expert witness in litigation, condemnation and tax appeal cases. From 2004 to 2007, Ms. Fried assisted in the project management and development of the \$45 million Fountain Square redevelopment, the public square in the heart of Downtown Cincinnati, for Cincinnati Center City Development Corp. (3CDC). In addition, she provided financial underwriting, analyses and recommendations to The Cincinnati Equity Fund and the Cincinnati New Markets Fund for downtown and Over-the-Rhine project investments. From 2007 to 2009, Ms. Fried performed financial feasibility analysis and due diligence on potential land developments for a \$70 million private equity development fund of Phillips Edison & Company, a national developer and owner of shopping centers.

Professional Affiliations

- Director, Ohio Chapter of the Appraisal Institute
- Member, Urban Land Institute (ULI)
- Member, Past Presidents Advisory Committee, CREW (Commercial Real Estate Women Network) Greater Cincinnati; president, 2004
- MAI designation, Appraisal Institute
- Certified general real estate appraiser, states of Indiana, Kentucky, Ohio and West Virginia

Ms. Fried earned her Master of Business Administration degree in finance and her Bachelor of Business Administration degree in marketing and real estate from the University of Cincinnati. More recently, she has completed the requirements of the Appraisal Institute's continuing education program.

ILEANA ABOT, GISP, MBA

Analyst, Valuation & Advisory

Newmark Knight Frank 300 E-Business Way Suite 200 Cincinnati, OH 45241 ileana.abot@ngkf.com T 513.247.6146 M 513.200.2573

Years of Experience

2.5 Years

Areas of Specialization

- Valuation of Office, Retail and Industrial Properties
- Site Selection, Demographic Analysis
- Location Analytics

Ileana Abot joined Newmark Knight Frank in 2018 and currently serves as an Analyst in the Valuation and Advisory team at the company's Cincinnati office. Ms. Abot is a Registered Real Estate Appraiser Assistant with 2.5-years of experience; a Geographic Information Systems (GIS) Professional with 10-years of experience in the local government GIS industry including planning, design, implementation, and management; and an Architect with 9-years of experience in architecture/civil engineering design and project management.

Ms. Abot joined Newmark Knight Frank after serving as a Commercial Real Estate Appraiser Assistant at Gem Real Estate Advisory Group in Cincinnati, OH. In this capacity, she prepared market value appraisals on commercial, office and retail, as well as industrial real estate assets; prepared written reports; conducted discussions with market participants; and made sales' comparison analyses. In addition, she performed demographic analyses and maintained databases of real estate property leases/sale transactions in the Cincinnati/Dayton/Columbus/Cleveland metropolitan areas. Prior to Gem Real Estate Advisory Group, Ms. Abot served as a GIS Manager for Hamilton County Planning Department where she planned, directed and prepared work programs for the maintenance of the department's GIS mapping systems. Previous work experience includes Dearborn County GIS, Cincinnati Area GIS and OKI Regional Council of Governments.

PROFESSIONAL ACHIEVEMENTS AND AFFILIATIONS:

- Registered Real Estate Appraiser Assistant in Ohio (#2016003772)
- Practicing Affiliate, Appraisal Institute
- Certified GIS Professional, GIS Certification Institute (#58493)
- Member of the Urban and Regional Information Systems Association (URISA)
- 2013-2014 Vice Chair of the Cincinnati Area GIS (CAGIS) Technical Advisory Committee
- 2010-2011 Chair of the Cincinnati Area GIS (CAGIS) Technical Advisory Committee
- Nominated Hamilton County Employee of the Year Innovation Category - 2011
- Master of Business Administration, Xavier University Pricing Strategy & Business Intelligence
- Master of Community Planning, University of Cincinnati Physical Planning & GIS
- Architect, University of the Republic Montevideo, Uruguay

150.310.1 Purposes.

Multi-family residential districts (SMF, EMF, MMF) and their regulations are established in order to achieve the following purposes:

- (A) To provide for orderly growth and development in the City of Dayton.
- (B) To reflect and reinforce desired development patterns in existing neighborhoods while accommodating the need for future growth.
- (C) To preserve the character of differing neighborhoods by providing different districts with different densities and development standards.
- (D) To regulate the bulk and location of dwellings to maintain privacy, safety and open spaces for each unit appropriate for the various districts.
- (E) To provide for proper location of institutions and other community facilities for the general convenience, safety and amenity of residents.
- (F) To provide assurance to property owners, developers and neighbors about the limits of what is allowed in a residentially zoned area.
- (G) To carry out the following specific purposes:
 - (1) <u>Suburban Multi-Family Residential Districts</u>. The purpose of the Suburban Multi-Family Residential Districts is to promote, preserve and protect neighborhoods intended primarily for multi-family dwellings that are suburban in character. As set forth in the City's Comprehensive Plan, Suburban multi-family residential development will be in scale with existing development patterns.
 - (2) <u>Eclectic Multi-Family Residential Districts</u>. The purpose of the Eclectic Multi-Family Residential Districts is to promote, preserve and protect neighborhoods

intended primarily for multi-family dwellings that are more urban in character. Eclectic areas include neighborhoods of varying density. As set forth in the City's Comprehensive Plan, Eclectic multi-family residential development will be in scale with existing development patterns.

The EMF District is designed to accommodate primarily medium-density multifamily dwellings. The maximum density permitted in this district is established by the bulk regulations that require new development or redevelopment to be similar in character to existing development. Single-family and two-family dwellings are also permitted.

Mature Multi-Family Residential Districts. The purpose of the Mature Multi-(3) Family Residential Districts is to promote, preserve and protect neighborhoods with traditional urban character. Mature areas are generally the oldest, close-todowntown residential areas in the City. Small, dense lots were generally developed before 1920 in a regular grid street pattern. As set forth in the City's Comprehensive Plan, Mature multi-family residential development will encourage historic preservation, development similar in character to existing development and well-designed, adaptive reuse of commercial and industrial buildings.

The MMF District is designed to accommodate primarily high-density multifamily dwellings. The maximum density permitted in this district is established by the bulk regulations that require new development and redevelopment to be similar in character to existing development. Single-family and two-family dwellings are also permitted. (Ord. 30515-05, passed 12-28-05)

150.310.2 **Permitted Uses**

- (A) Permitted Uses. See sub-section 150.300.2, Use Regulations.

Section 150.325 Commercial Districts

§150.325.1	Purposes	§150.325.8	Accessory Use Regulations
§150.325.2	Permitted Uses	§150.325.9	Landscaping and Screening Requirements
§150.325.3	Lot and Setback Requirements	§150.325.10	Performance Standards
§150.325.4	Height Regulations	§150.325.11	Supplement Regulations for Specific Uses
§150.325.5	Off-Street Parking Regulations	§150.325.12	Site Design Review
§150.325.6	Design Standards		
§150.325.7	Outdoor Display and Outdoor Storage Regulations		

150.325.1 Purposes.

The Commercial districts (MNC, ENC, SNC, MGC, EGC, SGC) and their regulations are established in order to achieve the following purposes:

- (A) To provide for orderly growth and development in the City of Dayton.
- (B) To provide sufficient areas, in appropriate and convenient locations, for business activities and the exchange of goods and services.
- (C) To reflect and reinforce the existing density and pattern of development while accommodating the need for future growth.
- (D) To provide certainty to property owners, developers and neighbors about the limits of what is allowed in a Commercial district.

To carry out the above principles and to effectuate the goals and objectives in the City's Comprehensive Plan, it has been determined that the following Districts are necessary. The specific purposes for these Districts are:

- (A) <u>Neighborhood Commercial Districts</u>. To accommodate retail and service uses that typically serve a limited neighborhood area, or other retail uses that serve a more general market area but can successfully operate within a neighborhood district. Such commercial uses are necessary to satisfy basic shopping and service needs that occur frequently and must, therefore, be located close to residential areas. The character of these districts is intended to be compatible with that of surrounding residential neighborhoods, and hours of operation are limited. Buildings in these districts are typically smaller in scale than those found in the general commercial districts.
 - (1) Development in the <u>Mature Neighborhood Commercial (MNC) District</u> should have an urban form and be pedestrian-oriented. Preservation of historic buildings is strongly encouraged.
 - (2) The <u>Eclectic Neighborhood Commercial (ENC) District</u> is not quite as urban as the MNC District, but pedestrian-oriented development and preservation of historic buildings is expected.

- (3) The <u>Suburban Neighborhood Commercial (SNC) District</u> is characterized by a suburban development pattern. Although a pedestrian orientation is encouraged, development may be more auto-oriented than the MNC or ENC commercial districts.
- (B) <u>General Commercial Districts</u>. To provide a wide range of goods and services to a large consumer population coming from an extensive area.
 - (1) Development in the <u>Mature General Commercial (MGC)</u> District must have an urban development pattern. The buildings are to be at or close to the sidewalk. The land uses may be more intense, than typically found in other neighborhood commercial districts.
 - (2) Development in the <u>Eclectic General Commercial (EGC) District</u> may be more suburban in form, but pedestrian orientation is still a priority.
 - (3) The <u>Suburban General Commercial (SGC) District</u> will have a suburban development pattern, with the largest lots and the deepest building setbacks of all the commercial districts. (Ord. 30515-05, passed 12-28-05)

150.325.2 Permitted Uses.

- (A) <u>Permitted Uses</u>. See sub-section 150.300.2, Use Regulations.
- (B) <u>Schedule 150.325.2 of Permitted Uses</u>. (Ord. 30515-05, passed 12-28-05; amend Ord. 30643-07, passed 3-21-07; amend Ord. 30762-08, passed 7-16-08; amend Ord. 30893-09, passed 7-15-09; amend Ord. 31028-10, passed 10-20-10; amend Ord. 31142-11, passed 12-21-11; amend Ord. 31283-13, passed 12-18-13; amend Ord. 31490-16, passed 5-04-16; amend Ord. 31574-17, passed 7-05-17)

Comments

This former school property sold in March 2016 for \$262,000 (\$4.38/SF). The property was formerly occupied by the East Pilgrim Elementary school. The school opened in 1922 and occupied the building until 2004. Since then, the property remained vacant. Initially, the buyer, a non-profit organization dedicated to create healthy, financially and environmentally sustainable communities, planned to occupy the building. Currently, the owner is considering demolishing the building due to its non-effective renovation costs.

Comments

This former elementary school sold in April 2016 for \$300,000 (\$5.56/SF). The property was formerly occupied by the Heyl Avenue elementary school. The school was built in 1910 and remodeled in 1956. The property was vacant at the time of the sale. The buyer planned to demolish the existing improvements and redevelop the site with a three-story building of 58 affordable housing units and four town-home buildings.
